### Abstract:

The IPCC report shows the need for “radical and transformative change”. Next week the Intergovernmental Panel on Climate Change (IPCC) will publish its report on the impacts of global warming. Building on its recent update of the physical science of global warming, the IPCC’s new report should leave the world in no doubt about the scale and immediacy of the threat to human survival, health, and wellbeing.

### Resource Description

#### Exposure : ☒

weather or climate related pathway by which climate change affects health

Unspecified Exposure

#### Geographic Feature: ☒

resource focuses on specific type of geography

None or Unspecified

#### Geographic Location: ☒

resource focuses on specific location

Global or Unspecified

#### Health Co-Benefit/Co-Harm (Adaption/Mitigation): ☒

specification of beneficial or harmful impacts to health resulting from efforts to reduce or cope with greenhouse gases

A focus of content

#### Health Impact: ☒

specification of health effect or disease related to climate change exposure

General Health Impact

#### Medical Community Engagement: ☒

# Climate Change and Human Health Literature Portal

resource focus on how the medical community discusses or acts to address health impacts of climate change

A focus of content

## **Mitigation/Adaptation:**

mitigation or adaptation strategy is a focus of resource

Mitigation

## **Resource Type:**

format or standard characteristic of resource

Policy/Opinion

## **Timescale:**

time period studied

Time Scale Unspecified
